01 Profile

Graphic and digital designer with five years of e-commerce experience, focused on web design and frontend with an AI-First mindset. I design interfaces in Figma, from structure to prototype, and build them with HTML, CSS (Flexbox, Grid, responsive) and JavaScript. I maintain and customize WordPress and use generative AI (Gemini, ChatGPT, Claude) as part of my workflow, always with judgment and my own creative direction.

02 Experience

Graphic & Digital Designer

04/2021 – 07/2026

Vaukura / Cashdisplay · Grupo Herme

Madrid

- Designed the full interface and structure of vaukura.com (~400 products) and cashdisplay.com in Figma, and coordinated implementation with an external development team.
- Hands-on WordPress maintenance and edits: theme customization, new pages, product listings, and code-level troubleshooting.
- Led design for both sites: product photography and image order, banners, newsletters, social media (proposed opening the brand's Instagram) and on-page SEO.
- Produced AI-generated furniture photo books (Gemini) in the absence of a photo studio, and automated repetitive tasks with Claude, always under my own creative direction.
- Defined the design team's workflow: product-reference naming and a shared folder structure (RAW, edited, PSD, web) on the company server.

03 Web projects

P/01 · Web design · Figma

Vaukura e-commerce website

Full Figma design of the design-furniture online store: structure, navigation and interface. It is the live site today, built by an external team from my design.

Figma · UX/UI · E-commerce

↗ vaukura.com

P/02 · Design + code

Furniture e-commerce

Responsive online store designed and built from scratch: product catalogue, materials, shipping plans, reviews and contact form.

HTML · CSS · Responsive · GitHub Pages
