01 Profile

Web and UX/UI designer with six years of experience in graphic design, branding and e-commerce. I design interfaces in Figma, from structure to prototype, so they look good but above all are easy to use, and I can build them with HTML, CSS (Flexbox, Grid, responsive) and JavaScript. I come from art direction and visual identity, and I use generative AI as a tool, always with judgment and my own creative direction.

02 Experience

Art Director & Senior Graphic Designer

04/2021 – 07/2026

Vaukura / Cashdisplay · Grupo Herme — Madrid

- Designed the full interface and structure of vaukura.com (~400 products) and cashdisplay.com (~3,000) in Figma, and coordinated their build with an external development team.
- Hands-on WordPress maintenance and edits: theme customization, new pages, product listings and code-level fixes.
- Art direction for both brands: Vaukura's identity and logo redesign, product photography with my own editing method, banners, newsletters, social media and on-page SEO.
- Moved Vaukura's room photos from the studio to generative AI (Nano Banana) under my own art direction.
- Trade fair and event graphics: stand visuals, large format (roll-ups, pop-ups, displays), prepress, budgets and set-up planning.
- Organized information-heavy workflows to speed up the team's day-to-day, and automated repetitive tasks with AI.

03 Web projects

P/01 · Web design · Figma

Vaukura e-commerce website

Full Figma design of the online store: structure, navigation and interface. It is the live website today, built from my design.

Figma · UX/UI · E-commerce
